

Parts of an Angle

Vertex:

The common vertex of the angle. In the above diagram, the vertex is **B**.

Vertex is the common vertex of the angle. In the above diagram, the vertex is the lowercase letter **b**.

Arms:

The two rays that make an angle are called the arms of an angle. They are represented by two points on the rays and a 'ray' symbol on top. Here, \overrightarrow{BA} and \overrightarrow{BC} are the arms of the angle.
