

Name : \_\_\_\_\_

## Circle - Area

Diameter: MS3

Example :

**Area of a circle =  $\pi r^2$**

Diameter = 44 ft

Radius (r) = 22 ft

Area =  $\pi r^2$

=  $3.14 \times 22 \times 22$

Area = **1519.8 ft<sup>2</sup>**

Find the area of each circle. Round your answer to the nearest tenth. (use  $\pi = 3.14$ )
