

Name: _____

Comparing 2-Digit Numbers - Base Ten Blocks

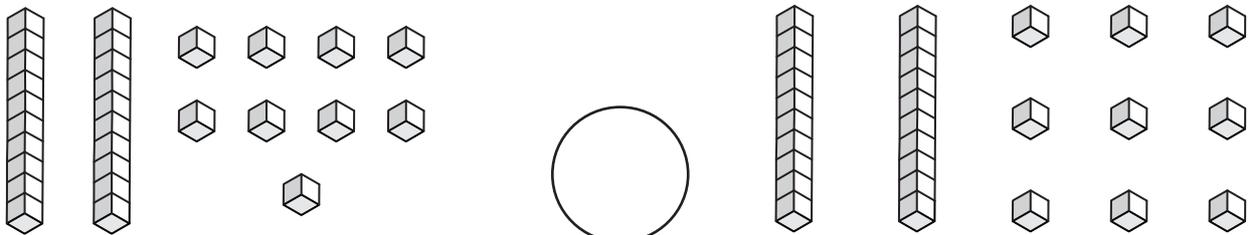

Count the base-ten blocks in each set, and compare using $<$, $>$, or $=$.

1)

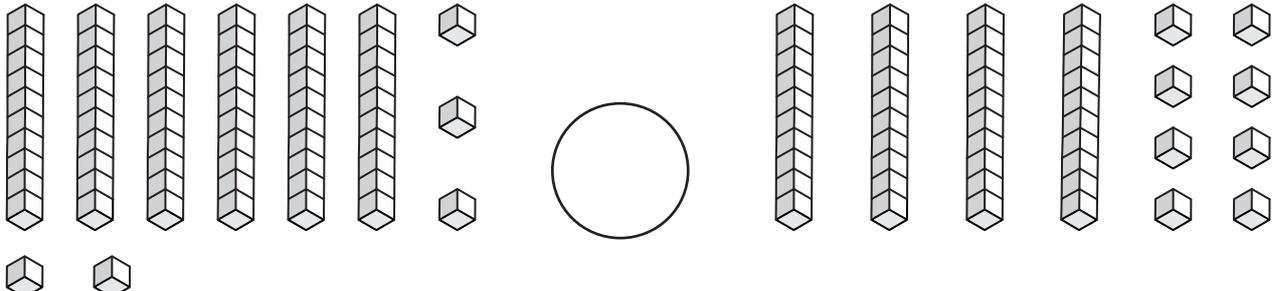

The first set consists of 3 tens rods and 3 ones units, representing the number 33. The second set consists of 7 tens rods and 7 ones units, representing the number 77. A circle is placed between the two sets for comparison.

2)

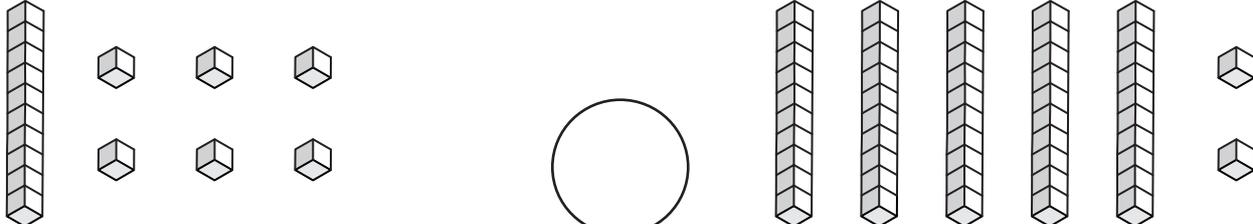

The first set consists of 2 tens rods and 7 ones units, representing the number 27. The second set consists of 3 tens rods and 3 ones units, representing the number 33. A circle is placed between the two sets for comparison.

3)

The first set consists of 6 tens rods and 2 ones units, representing the number 62. The second set consists of 4 tens rods and 6 ones units, representing the number 46. A circle is placed between the two sets for comparison.

4)

The first set consists of 1 ten rod and 4 ones units, representing the number 14. The second set consists of 5 tens rods and 1 one unit, representing the number 51. A circle is placed between the two sets for comparison.
