

Midpoint and Distance Formula

Solve each problem. Round the answer to the nearest tenth.

- 1) P and Q are the midpoints of \overline{AD} and \overline{BC} respectively. Find the length of \overline{PQ} .

- 2) Find the length of the median \overline{GX} .

- 3) A and B are the midpoints of \overline{XJ} and \overline{YL} respectively. Find the length of \overline{AB} .
