- 1) On Monday, Nancy picked a bag of grapes. If Nancy was billed \$12.00, how much does John owe Nancy?
- 2) The fruit aisle in the supermarket is arranged in 5 rows. How many items are there in each row?
- 3) On Friday evening, John had a party at home. How much does each pack cost, if he is billed for a total of \$32?
- 4) A single door display refrigerator at the supermarket can hold 72 beverages in all. If the refrigerator has 6 racks in total, how many beverages will each rack contain?
- 5) There are 18 customers waiting to pay their bills at 3 cash counters. If they have been split up equally, how many customers can be found standing at each cash counter?
