

Name : \_\_\_\_\_

## Solve

Unlike fractions: S4

Find the value of the variable in each problem.

$$1) \frac{7}{a} + \frac{11}{12} = \frac{25}{12} \quad a = \boxed{\phantom{00}}$$

$$2) \frac{y}{15} + \frac{2}{3} = 1\frac{8}{15} \quad y = \boxed{\phantom{00}}$$

$$3) 2\frac{1}{4} + \frac{9}{-7} = \boxed{\phantom{00}}$$

$$4) \frac{5}{q} + \boxed{\phantom{00}}$$

$$5) 2\frac{8}{14} + \boxed{\phantom{00}}$$

$$6) \frac{3}{4} + \boxed{\phantom{00}}$$

$$7) \frac{13}{10} + \boxed{\phantom{00}}$$

$$8) \frac{14}{d} + 9 = 3 \sim z \quad \boxed{\phantom{00}}$$

$$9) 2\frac{1}{2} + 3\frac{3}{4} = \frac{z}{4} \quad z = \boxed{\phantom{00}}$$

$$10) \frac{5}{8} + \frac{9}{c} = 1\frac{3}{16} \quad c = \boxed{\phantom{00}}$$
