

Comparing Integers

Sheet 2

- B) Angeline analyzes the physical properties of a few elements. She notes the boiling points of these elements and tabulates the data. Read the data and answer the following questions.

Element	Oxygen	Nitrogen	Hydrogen	Iodine	Phosphorus
Boiling point (°C)	-183	-196	-253	184	280

Answer the following questions based on the data given above:

- 1) Find the element that

- 2) Which element records

- 3) Iodine has the highest

- 4) What is the difference

- 5) Oxygen has a lower boiling point than Nitrogen. If false, support your answer.

- 6) List the elements whose temperatures range between -196°C and 280°C .
