

Name : _____

Cardinal and Ordinal Determiners

While a **cardinal determiner** specifies a quantity to the noun it's followed by, an **ordinal determiner** helps identify the order or position of the noun.

Examples of cardinal determiners are one, two, three, four, etc., and examples of ordinal determiners are first, second, third, fourth, etc.

Examples: Drake bought **five** apples.

This is my **fifth** poem in this series.

Complete each sentence choosing the correct determiner.

1) Little Arnold is ce _____ this week. (three / third)

2) This is Anna's _____ (nd)

3) Hannah gave me _____

4) The bus will reach _____ (d / three)

5) Its Dorothy's _____

6) Jupiter is the _____ (/ five)

7) Donald Trump is the _____ president of the United States.
(forty-five / forty-fifth)

8) There are _____ cars in the parking lot. (eighth / eight)
