

## Equation of a Line

Slope Intercept: L2S2

### Part - A

Write the equation of the line whose slope and the point through which it passes are given. Express the equation in slope-intercept form.

1)  $\left(-\frac{2}{3}, -\frac{8}{9}\right)$  and slope  $m = -5$

2)  $\left(\frac{7}{3}, \frac{2}{3}\right)$  and slope  $m = 4$

3)  $\left(\frac{5}{7}, -7\right)$  and slope

slope  $m = \frac{8}{7}$

5)  $\left(\frac{3}{4}, \frac{9}{2}\right)$  and slope

slope  $m = 2$

1) Find the equation

and whose slope is  $\frac{6}{5}$ .
