

## Equation of a Line

L2S4

### Part - A

Write the equation of the line whose slope and the point through which it passes are given. Express the equation in standard form.

1)  $\left(\frac{3}{2}, \frac{5}{4}\right)$  and slope  $m = 2$

2)  $\left(-1, \frac{3}{8}\right)$  and slope  $m = -\frac{1}{6}$

3)  $\left(6, -\frac{7}{3}\right)$  and slope

d slope  $m = -1$

5)  $\left(-\frac{1}{8}, 9\right)$  and slope

slope  $m = 6$

1) Find the equation

slope is 9.
