

**Multiplication**

## Sheet 1

Calculate the cost of objects.

1)

How much will 4 such dresses cost?

\_\_\_\_\_

2)

How much will 9 such paper cups cost?

\_\_\_\_\_

3)

How much will 7 such perfume bottles cost?

\_\_\_\_\_

4)

How much will 6 such jugs cost?

\_\_\_\_\_

5)

How much will 8 such pencil cases cost?

\_\_\_\_\_

6)

How much will 3 such pairs of sunglasses cost?

\_\_\_\_\_

7)

How much will 12 such shampoo bottles cost?

\_\_\_\_\_

8)

How much will 8 such party hats cost?

\_\_\_\_\_

## Multiplication

## Sheet 1

Calculate the cost of objects.

1)

How much will 4 such dresses cost?

$$\underline{11 \times 4 = 44}$$

2)

How much will 9 such paper cups cost?

$$\underline{2 \times 9 = 18}$$

3)

How much will 7 such perfume bottles cost?

$$\underline{9 \times 7 = 63}$$

4)

How much will 6 such jugs cost?

$$\underline{3 \times 6 = 18}$$

5)

How much will 8 such pencil cases cost?

$$\underline{6 \times 8 = 48}$$

6)

How much will 3 such pairs of sunglasses cost?

$$\underline{7 \times 3 = 21}$$

7)

How much will 12 such shampoo bottles cost?

$$\underline{5 \times 12 = 60}$$

8)

How much will 8 such party hats cost?

$$\underline{4 \times 8 = 32}$$
