

Name : _____

Scale Factors

L1S1

- 1) A cartographer creates a map of Bucks County with a scale factor of 1 inch = 2.5 miles. The distance between Quakertown and Sellersville is 2.92 inches on the map. Determine the actual distance between the two boroughs.

- 2) John, an architect, used a scale factor of 1 inch = 20 feet to design a site plan. The actual car park has been designed to be 18 feet long. Determine the length of the car park as depicted in the blueprint.

- 3) Lara made a scale model of a monument. If the height of the model is 1.6 feet, determine the actual height of the monument.

Scale factor of 1 inch = 1.6 feet.
Determine the actual height of the monument.

- 4) Elijah builds a model of a popular car. He uses a scale factor of 1 inch = 13.5 feet. If the model is 13.5 feet long, determine the actual length of the car.

Scale factor of 1 inch = 13.5 feet.
Determine the actual length of the car.

- 5) A scale model of a tree is 15 inches tall. If the scale factor is 1 inch = 0.5 foot, determine the actual height of the tree.

Scale factor of 1 inch = 0.5 foot.
Determine the actual height of the tree.
