

Name : _____

Speed, Distance, and Time

Sheet 1

- 1) While on a recreational trip to the mountains, Estella rides a snowmobile at an average speed of 100 miles per hour. If she covers a stretch of 250 miles, how much time does the ride last?

- 2) After spending his weekend with Grandpa, Cyrus climbs into a cab to go back to work. If it takes 2 hours to reach his 68-mile-away workplace, what is the average speed of the cab?

- 3) Richard is part of the security team at the airport. He inspects the runway, driving the truck at an average speed of 18 miles per hour. Determine the stretch of the runway he inspects.
