# Surface Area - Cone

A) Find the indicated measure. (use  $\pi = 3.14$ )

1) Surface Area =  $339.12 \text{ in}^2$

2) Surface Area =  $1,224.6 \text{ ft}^2$

3) Surface Area =  $452.16 \text{ yd}^2$

slant height = \_\_\_\_\_

height = \_\_\_\_\_

B) Find the indicated

4) Surface Area =  $175.84 \text{ yd}^2$

slant height = \_\_\_\_\_

6) Surface Area =  $1,347.06 \text{ ft}^2$

diameter = \_\_\_\_\_

Surface Area =  $1,224.6 \text{ ft}^2$ , slant height = 15 in

Surface Area =  $56 \text{ yd}^2$ , radius = 7 yd

slant height = \_\_\_\_\_

C) Find the height of the cone whose surface area is 301.44 square inches and radius is 6 inches. (use  $\pi = 3.14$ )
