

Name: _____

Converting from Kelvin to Celsius

Convert the temperatures from Kelvin to Celsius.

Example: Convert 293 K to °C.

$$C = K - 273.15$$

$$= 293 - 273.15 = 19.85 \text{ °C}$$

1) 302 K = _____ °C

2) 313 K = _____ °C

3) 247 K = _____

= _____ °C

5) 368 K = _____

= _____ °C

7) 409 K = _____

= _____ °C

9) 278 K = _____

= _____ °C

11) 349 K = _____ °C

12) 264 K = _____ °C

13) The temperature on the surface of Earth is 288 K. Find Earth's temperature in Celsius.
